

Four sessions will give you all the tools not only for the ukulele but any fretboard instrument

- Session 1 – Learn your way around a ukulele and master the open strings as well as the four “automatic” notes.
- Session 2 - Pull back and learn the four elements of music: rhythm, bass, harmony, and melody. Understanding these will allow you to “make haste slowly.” I promise, the light will go on.
- Session 3 – Using music principles, create the seven chords that make up 90% of all jam music. Then use the principles of music to fill in the rest.
- Session 4 – Go through popular songs with song sheets I have created. These highlight the four elements of music and allow you to apply this to any song sheet you get. You now have the tools to get jamming!
